U.S. department of the interior U.S. geological survey ... The fractal lognormal percentage theory can be thought of as a generalization of the 20/80 law using the lognor- mal distribution. The 20/80 law is a heuristic law that has evolved over the years into the following rule of thumb for many populations: 20% of the population accounts for.

Fractal invariable distribution and its application in ... This paper shows that a number of distributions, including power-function, Pareto, lognormal, and Zipf, display fractal properties under certain conditions and that this may be used as the mathematical basis for developing fractal models for data exhibiting such distributions.
